

## Citygreen Lunch & Learn Workshop

(5 person minimum)

60 minutes

+ LUNCH IS ON US!

Interactive,  
solutions-focused  
session tailored to  
urban landscape  
professionals

Discover how Citygreen, an innovation leader in sustainable urban infrastructure, is helping cities around the world grow healthier tree canopies faster, reduce urban heat, and manage stormwater more effectively. This interactive workshop explores the science, systems, and support behind high-performance green spaces in dense urban environments.

## Agenda Overview

### 1. Welcome + Introduction to Citygreen

- Our mission - Transforming grey infrastructure into green infrastructure.
- How Citygreen is enabling cities to meet climate, biodiversity, and livability goals through engineered urban greening systems.

### 2. Innovations in Urban Greening

- **Structural Soil Vault Systems** - Comparison of multiple vault technologies and how to simplify design for root volume, structural integrity, and cost-effectiveness.
- **Next-Generation Stormwater Capture + Reuse** - Learn about our newest product releases designed to:
  - Capture, store, and redistribute stormwater to nearby trees
  - Reduce Mean Annual Runoff Volume (MARV) through passive irrigation
  - Improve water resilience in public realm projects
- **Smart Monitoring Soil Moisture + Tree Health** - Discover how embedded sensor technology enables long-term monitoring of soil moisture, system performance, and canopy success.
- **Pilot Projects + Collaboration Opportunities** - Insights from groundbreaking pilot projects in collaboration with cities and utilities and how you can partner to push the boundaries of sustainable design.
- **Living Walls + Urban Greening Systems** - Scalable, modular systems that boost biodiversity, improve aesthetics, reduce air and noise pollution, and cool urban microclimates.

### 3. Results That Matter

- An in depth look at how one city achieved 34x faster canopy growth using integrated green infrastructure strategies.
- Real-world examples of stormwater compliance, urban heat mitigation, and increased project ROI.

### 4. Citygreen Design Studio + Technical Support

- Explore how our in-house Design Studio helps clients optimise layouts, integrate with stormwater models, and meet compliance.
- Bring drawings or layouts on your current or upcoming project for discussion.

### 5. Citygreen Projects + Turnkey Delivery

- **Citygreen's full service model** - reduce risk and save time and money with our full team of experts to guide concept, technical specification, procurement and installation. Backed by a 20-year warranty and guaranteed results.

### 6. Q&A + Project Collaboration Opportunities

- Ask the experts - get practical advice tailored to your projects and challenges.
- Learn how to partner with Citygreen on pilot programs, research, and innovation-led design.

#### Included

- CPD Attendance Certificate for all participants.
- Access to additional learning resources and technical support options.
- Optional up-coming project review session via Teams or Zoom.
